Re: Medicines & Healthcare Products Regulatory Agency (MHRA)
(Failure of Duties and Responsibilities to appropriately investigate vaccine injury and death).

(MP for Tonbridge and Malling)

Dear Mr Tugendhat,

Please see the attached letter I sent to the MHRA in March after reviewing the contents of their MHRA board meetings. They have failed to provide any response to my concerns. I think you will find my letter self-explanatory.

Sir Christopher Chope recently stood up in parliament as a champion for the injured. He was castigated by the speaker of the house. A most damaging and disgusting response - that filled me with utter disbelief.

Please inform me what proactive steps you have made to enquire into the ongoing threat to life and limb from experimental medical products.

All my life I have applied myself to the highest ethics. What I see now is a total unyielding mess of disgrace in those that hold public office. The gravity of their ignorance is sign posted in every piece of research I undertake.

Please offer your reassurance as the elected MP for this area that you will invest time into these matters.

The MHRA use a redundant data set (yellow card system). Its usage as a primary forensic tool, defies logic and integrity.

Your intervention is urgently needed.

Thank You

Colin Edge,
