

Transcript: Sex, globalism and the corruption of childhood from Alfred Kinsey to the United Nations, 21 February 2025

<https://www.americaoutloud.news/sex-globalism-and-the-corruption-of-childhood-from-alfred-kinsey-to-the-united-nations/>

PB = Dr. Peter Breggin

GB = Ginger Breggin

RM = Rhonda Miller

PB: Welcome. Welcome. Excuse me. Folks, I have a little virus. This is Peter Breggin, an MD with a virus under his name today. And, and so you're gonna hear some hoarseness in my voice, And I actually think I got it from my wife, although she sounds better than I do.

GB: Maybe. Hi, folks. This is Ginger Bregan.

PB: And, we've got actually a very serious show today, so we're beginning with a with a little lightness. I wanna remind people that, we recently realized that, all of the shows that I've ever done and now with Ginger can be found in one good solid place. And then going back to 02/2010 with my first individual radio show. And they can all be found on [Dr. Peter Breggin Hour](#) on PodBean

So we are really excited about the fact, we didn't even know this, that on the largest podcast platform in the world, PodBean, you can go and easily find the Peter Breggin Show. And the format is where it's coming out of PRN FM out of New York, where I had my very first show, actually. So they've just kept it up. And even though we've gone on different formats, even though at times it was a TV show, the whole continuity is there from 2010 on PodBean The Dr. Peter Breggin show.

GB: And you have almost it's approaching a million downloads. Just on that particular platform.

PB: But we're on every single basic Podbean platform that's out there, and we're really getting out to many more, probably millions now of people on some on some of our days where we are where we'll you know, we have 60,000 on our most direct, platform, which is the Substack, but we're also on *America Out Loud*, another whole outlet. And America Out Loud and PRN FM, which are carrying us, are in the top 1% of the, platforms on the Internet. So, I mean, it's really quite remarkable what's going on. But there's still a lot of hush-hush over us, you know, clearly if, ever since being, you know, really they started to throw us off the media many, many, many decades ago.

Today is a is going to be an interesting show. You need to put on, kinda put on a little bit of your armour [of God] because we're gonna be talking about evil stuff. We're gonna be talking about some of the heart of evil stuff.

And, something that affected me as a pretty young boy, I might just mention, is the work of Alfred Kinsey, who was, a very hateful, violent man who set up much of the whole concept of the child abuse being okay, being a petter ass [?] being an okay

thing, not having any kind of family discipline or ethics being an okay thing, destroying Christian tradition about human relationships being okay thing. That's out for Kinsey and his books on sex.

And our guest [today] is Rhonda Miller. We've had Rhonda on before and Ginger is in regular correspondence with her. And Rhonda came to our attention through Judith Reisman who I've known for years, and who was gone now. She was very interested in unmasking Kinsey. She became the leader of trying to unmask Kinsey for his evil. Very relevant today even down to, CIA connections.

One of the things we're talking about lately is you go to power and you go to evil, and then you almost always go to child abuse. And this is, I'm glad to see Rhonda Miller nodding along with me, this is something we've just seen now again and again. And, you see a very powerful person, and you're probably seeing a man who is evil and is surrounded by evil, and you're probably gonna find child abuse. It's not always the case. I've been learning a lot about Elon Musk and he is, I believe, an enormously idealistic man as he's working now with Donald Trump. So, I wanna take that back as a rare exception in a man with so much power but who is an idealist, very much devoted to the well-being of humanity. It's most remarkable to see these two men working together, Musk and Trump.

But this show is going to go into the depths of these issues. I'm gonna ask Rhonda to give a little bit of her own background, but her main position is the CEO of [Purple for Parents United](#) against the Kinsey Institute. And, I hope she doesn't mind my giving this much background but it'll let her take off more like one of Elon's rocket ships or maybe.

The McKinsey Institute is at Indiana University, and the president is not letting it be put down. It needs to be put down as a form of evil. And, [Rhonda] has been working very, very hard to remove this blotch from American culture, American history, and she's gonna tell us a lot about that.

The way it influenced me is that due to CIA funding and other support, Kinsey's two books in the 1950s, Rhonda, what are the dates of the two Kinsey books, the male and female books?

RM: Male was out in '48 and female was in '53.

PB: So at '48, I'm back in high school. I'm in high school in '50 or '54, so I'm in junior high school. And that book gets into my house, I do believe, through one of the big book clubs and that would have been left in my house without my parents necessarily reading it. They weren't really big readers. And so, I was reading very early about how we were all multi-sexual and we all were, basically, sex beings and reading, without knowing it, experiments on child abuse being published for the public as learning about orgasms and babies and things like this. It's really a horrific thing but it is key to this fundamental principle of power and evil and the connections to the deep state and a lot of what both Elon and Trump are trying to get rid of.

So, Ginger, anything else, and or should we just hand the baton to Rhonda?

Oh, I wanted to say this too. If there's anybody out there who wants to make donations to this important fight to keep looking into this evil and also working toward the elimination of the Kinsey Institute from a major university. I'll ask Rhonda to identify where you can send money. And if you're a big donor, she could use a little help right now. People as moral as Rhonda Miller are always under attack and they're not always as fortunate as me and Ginger to have been built an independent financial way of life early on. So, Rhonda is somebody I'd like to see people give a hand to.

So hello, Rhonda, and that's my stumbling introduction of you today.

GB: While we're thinking about it, Rhonda, let people know how they can find you and make donations To begin.

RM: Yeah. Thank you, Peter and Ginger, for having me having me back. It's an honour to be with you guys again this morning. So, yes, our website is purpleforparentsindiana.org. There is a donate button there if you are willing to contribute to our efforts. We don't get paid to do this and so we're hoping to be able to launch our organisation to the next level and be able to do that so that we can do this and fight this battle full-time, because it is a major battle to undertake.

I have been doing this for a number of years. I started digging into education, just give you a little bit of background, in 2010-2012 I stumbled on Alfred Kinsey and the whole LGBTQ agenda through that effort. And then, through a series of events, was able to meet Dr. Reisman at a weekend conference. And, she became my mentor and she became a very dear friend. So we talked quite a bit, back and forth. And so, she knew I was leading the way in Indiana to go after the Kinsey Institute. And I will say it was an honour to be able to bring her to Indiana in 2019 and actually take her to the institute itself. That was a big honour for us, for our organisation.

Fast forward a few years, she's trained me on everything Kinsey and what she had uncovered. And then she and I worked together on a paper, that is up [on our website that you can read](#), that ties Kinsey and the CIA's MK Ultra experiments that they were doing - the mind control experiments also known as the LSD experiments - and how they were funded by the Rockefeller Foundation.

The whole point was for Kinsey to, essentially find the scientific data, if you will, that Judeo-Christian sexuality morals and laws were unnatural and oppressive. And so by doing experiments on children and gathering data from paedophiles and rapists across the globe, if you will, because he was actually working with a Nazi, to collect this data, he was able to determine that children are essentially sexual from birth. And so, how they did that well on page 180 in the male version is table 34. which really caught Judith's attention. where they had, by stopwatch, kept the data of young boys as they were stimulated, sexually stimulated, around the clock to determine how many orgasms they would have in a twenty-four-hour period. And that is pure torture and that is pure evil, honestly.

And, these experiments that they did on children, if you watch, the '[Secret History: Kinsey's Paedophiles](#)', "paed" which is a British spelling, you hear Clarence Tripp,

who was his videographer, kind of smirk and laugh about the fact they knew what they were doing was illegal. They didn't care. They were doing it anyway.

And so it's very telling as to where our society is at now knowing what was going on in the 1930s and 1940s as he was collecting all of his data to put forth these books and that the fact that the globalists who have admitted, David Rockefeller has admitted, that they were working behind the scenes to essentially take down the country and they were funding the effort.

So that is exactly what we're dealing with. And, unfortunately, IU [Indiana University] in Indiana is the epicentre of it, and that was the whole point of our efforts, educating Hoosiers. It took several years to educate enough Hoosiers to put enough pressure on the [legislators to pass an amendment](#) to the budget in 2023 to defund the Kinsey Institute. So, it was our efforts. It was our organisation that actually, made that happen. And I think that's one of the things we're gonna talk about today is how that process is playing out now with the whole defunding of the Kinsey Institute. So, in a nutshell, that's kinda where we are and what we've done.

PB: The Institute played a really big role in this overall picture, and you've been outlining that for us. I remember Judith talking about how Kinsey got involved with studies of poor lobotomised souls in state mental hospitals. This is where it gets into my arena and partly how I got involved very early with Judith and go so far back. I'm not even sure how we originally got working together,

They were actually doing sexual experiments on helpless inmates at a New York state facility, a state mental hospital, which really are like concentration camps and their death rates are so high, sometimes they like extermination camps. And, this was being done on people who had already had their brains [inadudible].

Now we're not gonna stay totally this dark, so don't leave us, but I just wanna keep weaving in the depth of this evil. And, what was that State Mental Hospital?

RM: One of them was one of them was Greystone.

PB: Yeah. Greystone.

RM: And I can't remember the other one. Vermont. There was a Vermont State Hospital. I've actually got the document up on our website and I've got it pulled up. So, I'm just kind of scrolling down through here as we're talking. But there were there were two major hospitals that he really worked with and Greystone was one and I think the other one might have been Vermont State Hospital that Dr. Judith Reisman talked about.

She also talked about, Peter, as conversations I had with her about his experiments on children and women that took place in the lobotomy - they were testing their sexual appetite before lobotomy and then after lobotomy to see how the differences were - but Judith really believed that if anybody ever started digging on the compounds in the land of these hospitals they would find mass graves because you could not have done this to especially children (young children and whatnot) these

experiments without having some kind of casualty to them. So that was always something that she brought to the conversation every time we would talk about this stuff, which is pretty disturbing.

PB: Yeah. I mean, we're kinda diving into this whole issue of continuing to face depths of evil. On a bit of a flyer, but it's so important just really pulling out of this for a minute. One of my deep concerns about, the vulnerabilities of, Donald Trump is I think at times he has trouble coming to grips with the depths of evil. And for that reason, he had so much difficulty during his, I think, first administration where he I don't think he could believe the amount of evil that was around him masquerading as consultants and friends and co-workers and so on. But going along with that, Trump is as yet - and I'd like to see people calling him on this - Trump is as yet to really come out against the mRNA vaccines totally. He's not gonna mandate them anymore but he's still proud of what he did with Operation Warp Speed and getting these vaccines, so-called vaccines, all over the country and the world.

It's just so important to try not to have, especially if you're acting in the public sphere, these blind spots about how badly people can behave and how badly organised psychiatry has behaved and still does. We still got electroshock treatment and I didn't get to stop every single lobotomy operation, we still got a few of those going on too. How bad the CIA is, the Department of Defence, how bad all of these ... And when we come back, we can also add to it with, Rhonda with what goes on with, the children coming across the border and the kind of organisations that are supporting their enslavement.

[Advert break]

GM: And we're back on *America Out Loud* with Dr. Peter and Ginger Breggin ... And we're with our guest, Rhonda Miller. Thank you so much for coming back, Rhonda. It's really great to see you again. And the topic that you have, oh my gosh, dedicated so much of your life to addressing and facing is such a difficult one but it's such a crucial one for really rescuing America, now, from the debauchery that has ended up occurring and the terrible acts that have occurred for so many children. So welcome back. And where would you like to pick up?

PB: We were talking about CPS [child protective services] if you wanna get into that and the border, child protective services.

RM: Again, it's an honour to be with you guys, so thank you so much for having me. It's always a pleasure to enjoy your company.

So yes, CPS is known by many in the trafficking industry as the biggest organisation that's trafficking children. One of our colleagues down here, as I've moved to Texas, [Jaco Booyens](#) talks about a lot about how CPS is heavily involved in the trafficking, especially of the children coming across the border through Mexico. And he came to Indiana to help us fight repealing our absentee exemption, which gave the schools the legal authority to distribute pornography, which feeds into the whole trafficking. We had quite a conversation with him, and we talked a lot about CPS and what happens at the border and how kids are distributed throughout the network through CPS in that effort.

And so, it is interesting that you go back to Kinsey and what he did and his crimes against children in order to determine that they're sexual from birth. And then you have this huge explosion of the use of pornography because [Hugh Hefner](#) read his books and he decided he was gonna become Kinsey's pamphleteer. So now, America, I think, is the number one consumer of pornography, the number one producer of pornography and we're consuming a huge amount of child sex trafficking. I mean, what did you expect when you've got, the government involved in all this and you've got, Alfred Kinsey's, crimes against children through his network that fed into all of this. So now you have CPS making huge amounts of money through what they're doing.

Jako had said, "Sex trafficking of children has become more powerful, more beneficial to those that traffic, than selling drugs because you can only sell the drug once, but you can sell the child multiple times." A child has a certain lifespan through this trafficking. And once that lifespan's up, they just toss them aside and they go get another kid, and they traffic that child. So, it's a lot more profitable, sadly to say, through these evil networks, but CPS is very much involved in it.

PB: Yeah. This connects with the show we did with JJ Carroll.

GB: Which was just about a month ago. Actually, he's going to be on, next week again.

PB: And JJ has been looking at this cesspool from the viewpoint of immigration. He's an immigration officer retired now. He's become a really very public freedom fighter who was focusing on this. And he's confirming, everything you're saying.

And, of course, the non-governmental organisations ("NGOs"), and Ginger's have been very interested in NGOs. They make a lot of money with the child traffic including, as best I can tell, Catholic charities. And, I remember, there was some problem with the air local airplanes. We ended up going to another airport to pick up somebody. I guess I'm not too sure how it happened but we ended up meeting some people coming in - It looked like really good professional people with a daughter coming into the US as immigrants, I don't know if they were legal or not - but they were on an airplane and Catholic charities hadn't picked them up because they were at the wrong airport. So we drove him into Ithaca from Syracuse Airport, made friends with them, and we were met by a man a very sleazy-looking guy from Catholic charities. And we tried to say to him, "Hey, we're in this community. You've got these new people in this community. He's an educated man. Here's my name and number and I'd like him to stay in touch with us and see how we can help him become part of the community here." And they just whisked them away and we never heard from them again. And that made me very suspicious. I mean, you'd think a Catholic charity would say, "Oh, that's great. You're a local physician here and you're offering to lend them a hand." So that was just a little brush we had with this.

GB: Back in the teens [2019 and before] before everybody's eyes were opened.

PB: Yeah. That's right. It would have been before covid.

So, there's no way to exaggerate the depth of what is going on at the border and its connection. You get into the P. Diddy things. Where does your experience fill in with this? Because I know you have a lot of experience beyond just Kinsey. You were doing stuff before, addressing Rhonda Miller now, to fill in there if you have something you wanna add to it.

RM: Yeah. I think these NGOs, Peter, as you allude to, people need to understand just how powerful they are and have been. I read the book '[Foundations: Their Power and Influence](#)' by René Wormser, who was a counsel to the [Reece Committee](#) that was set up decades ago to investigate the foundations that are working behind the scenes. And in that book, he determined that they are essentially the fourth branch. We know we have three branches of government. Right? But we have this fourth branch that's working behind the scenes that's really controlling everything.

And so, fast forward a few months, before we moved down here to Texas, I had the honour of going to being invited to a private meeting to listen to a guy speak and I had no idea who I was going to see. But there's a website I've been using to do a lot of my deep-dive research on these NGOs, and it's called [influencewatch.org](#). So I get to this private meeting. It's a great resource where people can go and they can punch in, your NGOs. And if they've done their research on them, they will be in there and you will get a lot of details. If not, you can also encourage them or send some information on another NGO and they'll do the research on them.

So I got to this private meeting and there was the president of the Capital Research Centre got up and spoke. His name is Scott Walter. He wrote the book '[Arabella](#)'. So I ordered the book, after this event, and read it. And he lays it out beautifully how these NGOs work in tandem. And there's one network - the reason it's called "Arabella" - there's one network called Arabella Advisors that's incredibly powerful. They now raise more money than the two political parties put together.

And you've got organisations like the Rockefeller Foundation, the Gates Foundation and Hewlett Packard Foundation. You've got the Weis Foundation, which I'll explain in a minute what that is. But the spin-off of this Arabella Advisors, they've got, I think it's like five or six different - and I have a diagram of this up on our website, people can go and look in '[Dark Money](#)' is where it's located - but there's a web that they've created of 501(c)(3) and 501(c)(4)s. They funnel this money back and forth through this network.

And you talked about Catholic charities. One of the entities, New Venture Fund, was established essentially to infiltrate the church - more along the lines of for social reengineering of environmentalism. But it reminds me when you go back to these same foundations that funded Rockefellers, in particular, funded Kinsey also funded and worked to establish SIECUS, which is the Sexuality Information and Education Council of the US. They were established to be the sex ed arm of the Kinsey Institute.

And if you read the book called the '[SIECUS Circle](#)' - and I think I may have brought it up the last time we spoke, I worked with a colleague of mine to help her be able to

get these reprinted. So, we now have a certain number of these books because they're out of print. We now have a certain, number of these books that we have available now.

But that book lays out how Kinsey and those who work behind him - the CIA, the Rockefellers, whatnot - laid the foundation through SIECUS to really pervert our entire culture, our entire country. Claire Chambers, the author, does a really good job of bringing in the Marxists, the humanists and the communists and how they have used publishing companies, they've used the churches, they've used the NGOs, they've used the medical field. You talk about the psychiatry field; they've used all of it woven together with these enemies to our country. Essentially to take down the moral fibre of the nation but it was all built around Kinsey's crimes against children in order to do this. That is what is seeping into the schools and has been flooding, the libraries, flooding the curriculum, flooding the public libraries as well.

And so, you go back to SIECUS and the fact that it was founded with Hugh Hefner money; so Playboy money gave the groundwork for SIECUS to be established. Well, we go back to saying pornography is driving a lot of this trafficking of children because it gets men - men were the number one target of all of this because if you could take the men down, they wouldn't stand up and be protectors of women and children because you basically neutered them. Because you've got them hooked on pornography now and it just it drives more and more sadistic behaviour of men hooked on this. That is why we have we have seen the explosion of sex trafficking and why it's so prevalent in our own government even. And so, I think that is where that is where we are essentially seeing the fruits of those labours in our society now.

And you go back to, you talked about prior to covid most people were not awake. I would agree with you 100%. They were not awake. If one thing came out of covid that was positive, it woke a lot of Americans up. And so, it's been, quite an honour and quite a blessing at the same time to be able to be one that has the information and to be able to educate people on what's really going on.

GB: You mentioned the NGOs, and one of the things that I've been really pleased about in regards to the DOGE work is the exposure of the redirecting of funds - through convoluted pathways that it would be impossible for one human auditor to follow - into various executive branches, departments, segments, which then get sent to NGOs. I never had any idea that NGOs were being so deeply funded by our tax dollars. And then they get passed along from one NGO to another. This money is so washed it's white by the time it ends up stopping circulating. And the only way this ever would have gotten untangled was by a DOGE-like action. So, I for one as a taxpayer, am so happy that that is being done at this point because we really need to nail down where the money is going and how it's being used. And it's multiple billions and billions of dollars that are being used, I think, for very horrible goals.

RM: I would I would 100% agree with you. And I think it's gonna be fascinating as President Trump and his DOGE team uncover more and more of it.

I have been saying for some time that these entities, if you will, these NGOs at the highest levels - the Rockefellers, the Gates and various others - they've been using

our own resources to destroy the country from within. And I think they didn't have to fire a shot. We were told it would be done without firing a shot and so that is what we're seeing. And, the fact that President Trump and his DOGE team are hot on the trail of exposing all of this. I don't know if you guys have been on the website called '[Data Republican](#)', but you can find a lot of the money that flows into these NGOs on there and the exposures are huge. Unfortunately, it's been funnelling out in such a way that you're getting some of these "conservative groups" that are supposed to be working on our side. They're actually getting money through this funnel, if you will. So it's quite an interesting dynamic when you start delving into it. But these NGOs are a real problem.

PB: I think it's very important to see that all these ties eventually go back to globalism. And the names that are being picked up by Rhonda and Ginger and myself as we're chatting: Gates, Rockefeller, the CIA, the NGOs and a group we're not mentioning too much which is the UN, and that's something for you in the next section if you could tie into the UN in some ways. Because I know their agencies that work with children are horrendous. And that brings you then to communist China because the UN and the WHO are basically run by communist China.

So you have this whole picture here that we are describing in our work on our Substack, the [Dr. Peter and Ginger Breggin Substack](#), that there are these really two empires that are fighting over the carcass of the United States. Both of them are destroyed the United States as represented by Trump as represented by America First or Christian traditions as represented by the founding fathers and mothers of this nation. Those basic fundamental freedom values are being assaulted by these evil forces as a part of globalism, which is literally, I think many of their minds, in fact, the devil finally defeating God, or the devil being the true god and the sadism being the true attitudes, and violence and hate being the essential values. We're really looking at an evil of that size and we're looking at globalism. Our book, '*Covid-19 and the Global Predators*', out of shyness we don't we don't scream it from every show, and we should mention it always, '[Covid-19 and the Global Predators: We are the Prey](#)' because it is the deepest dive, still, into the criminal conspiracy. And with Bobby Kennedy now being the head of, HHS, we've lucked out because Kennedy early on gave us an endorsement of our book as the deepest dive into the globalist criminal conspiracy behind all the evil we're looking at. And, just wanna give a plug then still for our book. It's still, probably, the most comprehensive.

We'll go to break now ...

Rhonda, you've been listening to me chatting about the world, the globalist and the deep state do you know much more about the UN and its child agencies and that you can inform us about? I think that's another den of evil.

RM: So, the United Nations is one of the other components that I've been exposing for quite a number of years now, especially in the last year and a half. And UNESCO, in particular, let's talk about that.

UNESCO is heavily involved in this whole indoctrination of our kids in schools and behind social-emotional learning which drives a lot of this perversion into our schools. And so UN is very much involved in that.

The UN also has, as I've been told by Claire Chambers the author of the '*SIECUS Circle*', also has a satanic worship room, I can't remember what it's called, at the United Nations itself. She actually was able to get into it, believe it or not, and saw first-hand what it involves. But the UN has been known to, when it goes into countries, pillage and rape and molest children. Instead of providing security, it is participating in the evil acts against children in particular. And so the UN is heavily involved in that aspect of that.

And, you talk about the United Nations Sustainable Development Goals. People think that they're all about peace and safety and security. No. It's not. When you break it down and you really outline what they mean, think global and act local, what they're really doing is they're usurping our nation. They've taken over, essentially, they have taken over the nation. And I'm thankful that President Trump is, once again, pulling us out of some of those tentacles of the UN because there are a lot of communists that work at the highest levels of the United Nations and their biggest goal was to remove the United States' sovereignty in order to have this global agenda; this global new world order or global reset is what they were after.

So, yes, the United Nations is deeply involved in this whole perversion of children and torture of children through sex crimes that they've committed across the globe.

PB: The UN is also involved in the worst attack on the Jews since the Holocaust - in October, a year ago [in 2023]. And some of these UN agencies were actively involved with members organising or being in the attack. And the UN has been a great supporter of Hamas and other agencies working for Iran. Right. And if you wonder where Iran fits into it, Iran is a third empire it just doesn't get a lot of notice as an empire. But in addition to the Chinese empire, which is a very long tradition, hundreds of years of BC having totalitarian empires, kind of the seat of them, and then this with the CCP, with the Chinese Communist Party is also a globalist entity. Remember, it's "workers of the world unite." It's not nations of the world. It's the workers. It's globalism, all nations. And when you start looking at any really deep evil like we are today, you're just gonna see all these connections and they'll go to, ultimately, to antisemitism and to the destruction of the Jews as an identity because as a Jew - I come from the longest historical line of identifiable peoples, it literally goes back to the earliest written words, the earliest historical documents. It's hard to find another group that you can go back to 1,500 or two thousand years ago and say, "Ah, and here's its lines over the years." And every empire has tried to destroy us. That's the origins of them. That's the origin of antisemitism, folks. Every single empire has wanted to destroy us. The Roman Empire did their best. Multiple empires. The Greek Empire went after the Jews. I mean, it goes on and on.

So it's all about this centre of power, people who get together with power and wanna exploit everybody else. And you look at what they do and they go for the weakest, they go for making slaves of people, they go for children, they go for women. Eventually, they begin to, in a way, devour themselves they become so corrupt.

GB: They also want to negate individualism. And they want to destroy any kind of national identity. And I think, actually, the Jewish people have their own sense of a kind of a national identity.

PB: Oh, definitely, it's going all the way back to the temples in Jerusalem.

GB: Right. Exactly. And I believe that's another one of the reasons that they're [the Jews], the most targeted. Because the national the concept of a national identity, individuals identifying with their own group in a nation, which has boundaries and which has its own cultures, and they differ from place to place. That is the biggest threat to globalism.

PB: Whereas most other identities were wiped out along the way by the empire.

GB: Right. So, you have to get rid of those national identities in order to force someone into a collective mindset where they become just one of a thousand or one of a million.

PB: In Islam, the religion is inextricable from government. It's not just a religion. It's a governing process of nations and it too is an empire. It's just not quite as powerful an empire as the Eastern and the Western global empires right now.

RM: Well, if I could just jump in, I would add to that and my Agenda 2030 training that I do.

I have a couple of quotes from Maurice Strong, who's a former UN under-secretary general, where he says, "Either we reduce the world's population voluntarily or nature will do this for us brutally." And so I always take a pause at that and I'm thinking, what is what is his mindset? Why would he say such an evil thing? "Either we reduce the world's population voluntarily or nature will do it for us brutally."

And then he goes on, to also say "the combination of population growth and the growth and consumption is a danger that we are not prepared for and something that we need global cooperation on."

So, these people have been planning for population depopulation, if you will, no matter what the means takes. And you couple that with John Rockefeller saying, "the average citizen doesn't appreciate the social and economic implications of population growth and what it does to the quality of our lives. Rather than think of population growth as a negative thing, we should see that it can be enriching." So, we should find it enriching that they're trying to kill many of us.

And it goes on [in this book from Gary Allen](#) to say that the Rockefeller Foundation wanted 1,800,000 abortions a year. That's a lot of dead Americans. That's a lot of dead, citizens across the globe, if you will. It's appalling when you start digging into some of these people, in their mindsets of what they believed and what they really are out to do. It's very telling of the times that we're living in.

PB: I think I'll in the next few weeks, Ginger, I'll put up on our Substack about David Rockefeller and what he has done as a centre of evil. And he really is. He really was a centre of evil.

RM: There's one more if I can just plug this into you. Maurice Strong, again, going back to him, the former UN under-secretary general. He's in an article from, I think it's 2012, where he's quoted saying, "we may get to the point where the only way for saving the world will be for industrialized civilizations to collapse. Isn't it our responsibility to bring that about?" I mean, it's very telling. That's very telling of the mindset of these people who, have been in control of essentially of what's happening.

PB: And who is he again? I'm not sure I know him.

RM: He's Maurice Strong. He was a former UN under-secretary general. He's also known as the founding giant for the global environment movement. He was on he was a committee member of the Committee of 300. So, he had some pretty, pretty influential standing.

PB: Where do we go from here for the last seven minutes? I would I just love Rhonda to have you talk some more about all these interactions.

GB: Rhonda, you're really right on in regards to bringing up, like, the Committee of 300, the Rockefellers, so forth and so on. And it really goes back to these very, very powerful multi-billionaires, trillionaires perhaps, that are in the background, not even the ones that are so upfront. Although Bill Gates is a really good example of the arrogance and the hubris that you see from someone who feels that he's selected and special in order to run everyone else's life.

RM: He is. This training that I do is about an hour and forty-five minutes, hour and a half hour and forty-five minutes long. And I give document after document, their own words, their own videos. And I have one where he's actually talking about [Common Core](#). And he's smirking when he says that it was a state-led Common Core. And he's smirking because he knows it's not true; it's a total lie. He had an agreement with the United Nations to push Common Core but yet he passes it off like it's state-led. That was the whole point to get buy-in.

And so, this training that I do, though, is very eye-opening. I've had numerous people say, that, it's the best thing they've ever seen, they've ever they've ever watched. And to me, I've done it so many times, and the Lord actually gave me the layout of how he wanted it done. I include scripture in this, but it ties everything together very beautifully about how these NGOs, the globalists at the highest level, have usurped our country and taken it down from within.

And thank God we have President Trump who's out now, setting the record straight, and he's actually pushing back. And I believe we'll stop their agenda.

GB: Actually, your training sounds fascinating. What is the theme of it? Is it, the, agenda 2030? Is that the overarching concept?

RM: Yep. It's all wrapped around historical documents and breaking down their sustainable development goals. Breaking up with the United Nations is exactly what we've gotta do. We've gotta get out of the United Nations and get them out of our country.

GB: Is it possible for people to reach you? Are you do you do this on behalf of other groups if you're invited?

RM: Yeah. I've travelled all over; Indiana, Michigan, Kentucky and Missouri, even - with this message and did make a trip to Georgia. So, I mean, I'm willing to travel to do this presentation. I just need, some compensation and some expenses paid but I will go anywhere to get this message out. It's that important.

PB: Now Common Core is interesting that Bill Gates was also - wasn't he a very big deal behind Common Core getting it spread into the United States?

RM: He was because he had an agreement with the UN to push Common Core and support Common Core. And then you've got Condoleezza Rice. I have a document that she helped draft. She's a Republican. Right? Because it doesn't matter. Both parties, I mean, under communist goal number 15; infiltrate both political parties in the United States. So it doesn't matter, but she participated and helped draft this task force, independent task force report, number 68, I think it is, that, talked about the states should expand Common Core State Standards. Now she was a member of Rockefeller's Trilateral Commission in the Council on Foreign Relations. So that tells you it came down from the highest levels.

GB: And she was George W. Bush's Secretary of State.

RM: Right.

PB: And she's the head of Stanford University.

GB: Yeah. That's right. Well, you don't get you don't get to that position without being part of the in crowd.

RM: No, you don't. And then and so you look at you look at UNESCO, the World Economic Forum, and how they're using social-emotional learning as mind-thought control. I mean, that's essentially MK Ultra in the schools, if you will. I had a conversation with Judith over that. But you take a look at the organisation who's bringing in the social emotional learnings into the programs into the school, and it's funded by the same NGOs, the same globalists, with ties to this Arabella network that I talked about earlier.

GB: Could you tell us what social-emotional learning is briefly?

RM: Essentially, social-emotional learning is the thought reform, the social re-engineering that the globalists are using to change the thought patterns, attitudes, values, behaviours and beliefs of our children in the schools. It came down from the globalists and that is how they're usurping and they're brainwashing the kids in the schools.

PB: I wanna point out to our listeners that although we have emphasised our connection to Rhonda through the work of Judith Reisman, her knowledge is much broader than that and her activities are much broader than that. And, again, I think that Rhonda Miller is a very good place to help one of our real freedom fighters who just has been going through some difficult issues in terms of people trying to take her down and I would love to see some people come along and really help lift you up. And I'm just so glad here to be talking with you; the scope of your knowledge, and you truly are into the globalism.

How far back did you begin to understand globalism? I bet it was years ahead of me.

RM: No. It was back in 2010/2012 in the whole battle of Common Core where I really had my eyes opened and I just kept digging.

PB: A decade ahead of me.

GB: The early Obama years.

RM: Yes.

PB: Thank you, Rhonda. Rhonda, in contrast to us, we see each other, looks really just full of life and healthy and on top of things, And it's delightful to see you It's wonderful to see you. Spiritually thriving. And let's see if we get some help in for you, on the basics too as well.

RM: I appreciate that very much. And you guys look amazing for being sick. I would never have guessed that. You look very, very well. And it's always an honour to be with you guys. I consider you guys very dear friends.

PB: Thank you. We consider you the same. Thank you, Rhonda. God bless us all, and thank you, our wonderful, wonderful warriors.
